## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-15, 17-21, 23-29 are rejected under 35 U.S.C. 102(b) as being anticipated by McIlroy et al (4,701,774). McIlroy et al discloses the claimed invention. Figures 1 and 2 illustrate a semiconductor laser device comprising a doped semiconductor cladding layer (3), a semiconductor optical layer (41<sub>2</sub>); and an undoped semiconductor spacer layer (41<sub>1</sub>) positioned between the cladding layer (3) and the optical confinement layer (41<sub>2</sub>). Note further the substrate (1), the semiconductor active layer (43) for generating light, a semiconductor upper optical confinement layer (44<sub>1</sub>); a p-doped semiconductor upper cladding layer (5); and electrodes (8,9) for current injection to the device. See col. 6 lines 60-63 for the suggestion of InP and InGaAsP.

3. Claims 1-4, 6, 11, 20-22, 28-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Burnham et al (4,585,491). Burnham et al discloses the claimed invention.

Figure 1 illustrates a semiconductor laser device (10) comprising a doped semiconductor cladding layer (19), a semiconductor optical confinement layer (14); and an undoped semiconductor spacer layer (18) positioned between the cladding layer (19) and the optical confinement layer (14). Note further the substrate (22), the semiconductor active layer (12) for generating light.

#### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4, 16, 22 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over McIlroy et al as applied to claims 1-3, 5-15, 17-21, 23-29 above, and further in view of Burnham et al (4,585,491). McIlroy et al has been discussed except for the n-type dopant being Se. Burnham et al teaches Se is a well-known n-type dopant. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the n-type dopant being Se, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.
